Technical Growth & Digital Marketing Manager | Product & Web Analytics | Automation | SEO | Amsterdam/Haarlem
Amsterdam Area

Summary

I'm a technical, data-driven growth marketer who treats marketing like a measurable system, not a guessing game. I build reliable measurement (tracking plans, event taxonomy, data QA), translate behavior into funnels and insights, and automate workflows so teams move faster with fewer mistakes.

In B2B SaaS, I've led initiatives across SEO, lifecycle/CRM, and analytics: from instrumentation and conversion funnels to scalable content workflows and automation scripts in Python. I work comfortably between marketing, product, and engineering, turning ambiguous goals into clear experiments, dashboards, and execution.

What I do best:

Marketing & product analytics: funnel design, user journeys, activation/conversion analysis

Measurement & data quality: tracking plans, events and properties structure, QA, governance

Automation: Python scripts, data enrichment, repeatable pipelines for sales, marketing ops & reporting

SEO with measurement: technical SEO, scalable content systems, structured pages, monitoring impact

CRM & lifecycle: workflows, segmentation, deliverability hygiene, experiment-driven messaging

Experience

Pharmaoffer.com

Technical Digital Marketing Manager | B2B SaaS Growth | Product & Web Analytics

July 2023 - Present (2 years 7 months)

Haarlem, Noord-Holland, Nederland

As a technically-oriented Digital Marketing Manager at Pharmaoffer (B2B marketplace/SaaS), I drive growth through measurement, analytics, automation, and scalable acquisition systems across SEO and lifecycle marketing. I partner with engineering and content teams to ship trackable improvements to the website and funnels.

IMPACT / ACHIEVEMENTS

Built and maintained end-to-end funnel measurement (tracking strategy, event structure, reporting) to understand activation → conversion and diagnose drop-offs.

Improved data reliability by standardizing tracking conventions and monitoring key events and conversion paths.

Automated recurring marketing ops and reporting tasks with Python, reducing manual work and speeding up analysis cycles.

Led SEO growth initiatives (technical audits, internal structure, content systems) with a measurement-first approach: hypotheses, changes shipped, impact tracked.

Developed lifecycle/CRM automations (e.g., HubSpot workflows/segmentation) and improved email performance through deliverability-focused hygiene and testing.

Coordinated cross-functional execution across developers, designers, and content teams: defined requirements, shipped iterations, and validated impact via analytics.

TOOLS

GA4 • Amplitude • HubSpot • Python • SEO tooling • CMS • Tagging/Tracking frameworks

FishingStock

Digital Marketing Specialist | Performance, Analytics & Cross-Channel Growth

August 2020 - June 2023 (2 years 11 months)

Ukraine

As a Digital Marketing Specialist, I worked with Ukrainian and European e-commerce businesses and corporate websites, driving growth through a data-informed mix of organic and paid acquisition channels. I focused on turning traffic into measurable outcomes by continuously analyzing performance and optimizing campaigns across platforms.

I operated at the intersection of marketing execution, analytics, and coordination, ensuring that acquisition efforts, creative assets, and technical implementations were aligned and delivered on time.

Key Contributions & Scope

Cross-Channel Acquisition:

Planned and executed multi-channel acquisition strategies across Google Ads, Facebook, Instagram, and YouTube, balancing paid traffic with organic growth to maximize reach and efficiency.

Performance & Campaign Analysis:

Monitored campaign performance using core marketing metrics (traffic quality, engagement, conversions), identifying underperforming segments and iterating creatives, targeting, and budgets based on data.

Data-Informed Optimization:

Used performance insights to continuously refine campaigns, improve cost efficiency, and align marketing activities with business objectives rather than vanity metrics.

Project & Stakeholder Coordination:

Coordinated work between designers, developers, and content managers, translating marketing requirements into clear tasks and ensuring timely delivery across multiple projects.

Strategic Execution:

Implemented marketing strategies aligned with client and business goals, maintaining a balance between experimentation and predictable execution.

Outcome

By combining analytical thinking with hands-on execution, I contributed to sustainable traffic growth, improved campaign effectiveness, and stronger collaboration between marketing, creative, and technical teams across multiple markets.

Freelance

Web Developer & SEO Specialist | CMS, Technical SEO & Performance Foundations

July 2018 - June 2023 (5 years)

Ukraine

As a Web Developer and SEO Specialist, I built and optimized corporate websites, e-commerce stores, and promotional sites using CMS platforms such as WordPress and OpenCart. My focus was on creating technically sound websites that were easy to scale, discoverable by search engines, and aligned with business goals.

This role combined hands-on development with SEO fundamentals, content structure, and performance monitoring, forming a strong technical foundation for later work in growth and analytics.

Key Contributions & Scope

Website Development & Customization:

Developed and customized corporate websites, e-commerce stores, and landing pages on WordPress and OpenCart, adapting themes, plugins, and site structures to business requirements.

Technical & On-Page SEO:

Implemented SEO best practices including site structure optimization, metadata, internal linking, and content hierarchy to improve crawlability, indexation, and organic visibility.

Content & UX Optimization:

Managed and structured website content with a focus on clarity, usability, and alignment between user intent and page purpose.

Performance & Functionality Improvements:

Used CMS tools and plugins to improve site performance, stability, and functionality, ensuring reliable operation across different use cases.

Client & Stakeholder Collaboration:

Worked directly with clients to gather requirements, propose technical and SEO solutions, and deliver websites tailored to their goals.

Monitoring & Iteration:

Reviewed basic website and traffic metrics to identify improvement opportunities in content, structure, and user engagement.

Outcome

By combining web development with SEO and performance awareness, I delivered websites that were not only visually complete but also technically optimized for search visibility, usability, and long-term growth.

BRUSTORE

Digital Marketing Professional | WEB-master

June 2019 - August 2020 (1 year 3 months)

Ukraine

Delivered measurable growth across paid acquisition, website optimization, and social media advertising by applying a performance- and data-driven approach to campaign execution and iteration.

Selected Results & Impact

Acquisition Efficiency & CTR Growth:

Increased click-through rate (CTR) from 7% to 19% through systematic improvements in ad relevance, targeting, and creative alignment, significantly expanding qualified traffic and lead volume.

Budget Optimization & Lead Scaling:

Re-optimized campaign structure and bidding strategy to generate 2× more leads without increasing budget, reallocating freed budget toward remarketing and display networks to drive additional conversions.

CPC Reduction via Quality Improvements:

Improved Google Ads Quality Score from 6 to 9, resulting in a 32% decrease in CPC and enabling 1.5× more orders within the same spend, demonstrating strong alignment between keywords, ads, and landing pages.

Website & SEO Performance:

Optimized existing website content and technical SEO, driving +50% organic traffic growth and +30% conversion rate improvement.

For a new website, executed full SEO foundations including semantic analysis, keyword clustering, and site structure optimization.

Paid Social Campaigns:

Designed and executed targeted Facebook and Instagram campaigns, focusing on audience segmentation and message relevance to efficiently reach high-intent user groups.

Outcome

These initiatives improved acquisition efficiency, reduced wasted spend, and strengthened the connection between paid traffic, website performance, and conversions, contributing to sustainable growth rather than short-term gains.

SPEKTRUM COMPANY

SEO & Internet Marketing Manager | Technical SEO, Paid Search & Scalable Execution

August 2018 - July 2019 (1 year)

Kharkiv Region, Ukraine

As an SEO and Internet Marketing Manager, I led the development and growth of e-commerce websites through a structured combination of technical SEO, paid search, and cross-functional execution. My work focused on building scalable SEO foundations, improving site quality, and aligning acquisition efforts with long-term performance goals.

Key Contributions & Scope

Technical & Strategic SEO:

Conducted in-depth website analysis including semantic core development, keyword clustering, and site structure optimization. Performed full SEO audits, resolved technical and on-page issues, implemented XML sitemaps, optimized metadata, and built sustainable link profiles.

Website Quality & Maintenance:

Ensured website stability and performance by addressing technical issues, optimizing content and structure, and collaborating on feature improvements to support usability and search visibility.

Paid Search & Acquisition Support:

Planned and coordinated Google Search Ads campaigns to complement organic growth efforts and capture high-intent demand for e-commerce businesses.

Cross-Functional Project Coordination:

Planned and supervised work across web developers, copywriters, content managers, and designers, translating SEO and marketing requirements into clear technical and content tasks.

Execution at Scale:

Managed multiple websites and projects simultaneously, ensuring consistent quality standards and timely delivery across different business contexts.

Outcome

By combining technical SEO expertise with structured execution and paid acquisition support, I improved search visibility, site performance, and overall growth potential for multiple online stores.
